PROFESSIONAL SUMMARY

Full-Stack Developer and MCA candidate with hands-on internship experience building scalable web architectures, robust RESTful APIs, and practical AI/ML-assisted platforms. Proven track record of high-velocity delivery, securing 1st Place in three college hackathons. Strong foundation in JavaScript, TypeScript, Python, modern React/Next.js frontends, Node.js/FastAPI backends, and applied computer vision & natural language processing.

WORK EXPERIENCE

Entwicklera *April 2025 – June 2025*
Software Developer Intern Mumbai, India

- Architected and built full-stack web applications leveraging React, Next.js, Node.js, and FastAPI.
- Engineered scalable backend REST APIs and designed schema models across MongoDB and MySQL databases.
- Developed AI/ML-assisted features including OCR document extraction pipelines and intelligent screening algorithms.
- Enforced type-safe TypeScript interfaces, conducted code reviews, and optimized client-side bundle performance.

HACKATHON ACHIEVEMENTS (3× FIRST PLACE)

- **Jai Hind College Hackathon (2026) — Project: Aetherscan**
  1st Place Winner — Full-stack automated blockchain analytics and transaction tracking platform.
- **KC College Hackathon (2026) — Project: AI Fitness Tracker**
  1st Place Winner — Real-time computer vision pose estimation for exercise posture & rep analysis.
- **Kirti College Hackathon (2026) — Project: The Medium**
  1st Place Winner — High-performance collaborative web application delivered in a 24-hr sprint.

KEY PROJECTS

NURA-AI — AI-Assisted Healthcare Screening Platform
Technologies: Next.js, FastAPI, Python, Tesseract OCR, scikit-learn, Machine Learning
Built clinical screening workflow digitizing diagnostic reports via Tesseract OCR and evaluating biomarker risk indicators with sub-second API triag

MetaCity — AI-Powered Urban Digital Twin
Technologies: Three.js, React, Node.js, Python, Predictive AI, IoT Streams
Interactive 3D urban digital twin with real-time sensor overlays, predictive traffic modeling, and environmental telemetry visualization.

NK IMPEX — Live E-Commerce Platform with AI Assistant
Technologies: Next.js, Node.js, Express, MongoDB, NLP, Stripe API, Tailwind CSS
Production e-commerce platform featuring an intelligent conversational shopping assistant, live product search, and secure multi-tier checkout.

AI Fitness Tracker — Computer Vision Pose & Analytics
Technologies: Python, MediaPipe, OpenCV, React, Tailwind CSS
Real-time skeletal landmark detection calculating joint angles, form deviation alerts, and automatic workout rep counting.

2D Metaverse — Real-Time Virtual Workspace
Technologies: Phaser.js, React, Node.js, WebSockets, Colyseus
Multiplayer 2D virtual office environment providing real-time avatar movement, spatial presence, and proximity collaboration zones.

TECHNICAL SKILLS

Programming:	JavaScript (ES6+), TypeScript, Python, Java, SQL
Frontend:	HTML5, CSS3, React.js, Next.js, Angular.js, Tailwind CSS
Backend & APIs:	Node.js, Express.js, FastAPI, Prisma, ASP.NET, RESTful APIs, WebSockets
Databases:	MongoDB, PostgreSQL, MySQL, Redis
AI / ML & Vision:	PyTorch, TensorFlow, scikit-learn, Model Evaluation, NLP & RAG, Computer Vision (MediaPipe, OpenCV)
Data Analysis:	Pandas, NumPy, Excel, Matplotlib, Seaborn, Power BI
Tools & DevOps:	Git, GitHub, VS Code, Postman, Docker, Nginx

EDUCATION

Master of Computer Applications (MCA) *2025 – 2028 (Currently Pursuing)*
University of Mumbai — Mumbai, India

Bachelor of Science in Information Technology (B.Sc. IT) *Graduated*
University of Mumbai — Mumbai, India

CERTIFICATIONS

- Computer Science & Web Programming — HarvardX / edX
- Machine Learning & Deep Learning Specialization — DeepLearning.AI
- Python for Data Science & AI — IBM
- Front-End & Back-End Developer Professional Certificate — Meta
